Profile

I'm really proud of being part of this new revolution of the post-PC era. Now I have my own start-up, where I have learnt the value of pursuing your own ideas.

Skills

Mobile Developer

Great understanding of both the advantages and limitations of a mobile device, such as battery life, Interface Guidelines for small screens, response times, etc.

Backend Developer

Proven ability to write robust, scalable and secure software that can manage a huge amount of data or can handle many users at the same time.

Web Developer

Vast experience writing Web applications and specially bringing the link between that and the mobile apps.

Technical

Objective-C

OpenGL, OpenGL ES 2.0

OS X

C/C++
